

SUBJECT: Important Announcement from Phenix Technologies, Inc.

To our valued customers and vendors,

We are pleased to announce that, Doble Engineering Company has reached a definitive agreement to acquire the assets of Phenix Technologies, Inc. The transaction will complete in approximately two weeks after certain notices have been fulfilled.

Because we value your relationship with Phenix, we want to inform you about the acquisition and the strategic rationale. Phenix is complementary extension of Doble's existing portfolio of High Voltage electrical test solutions. While Phenix and Doble have historically focused on different market segments, we have many common customers and vendors. We share a similar vision and have common values, including a commitment to excellent customer service and reliable products. Going forward, Phenix will operate as a division of Doble from its existing facility in Accident, Maryland. Most importantly, Phenix employees will remain in their roles, continuing to support our customers.

Working together, we plan to continue to enhance the capabilities of our products', providing our customers with reliable test equipment to help ensure the reliability of electrical systems all over the globe. Becoming part of the Doble family strengthens our ability to grow internationally and through continued investment in product development.

We will continue to work with our industry partners to develop and build upon the fine products and services Doble and Phenix have created to-date.

This is an exciting time for our organization and we look forward to continuing to work with you now and into the future.

Yours sincerely,
